What Makes HCS Different? Prioritizing What Makes YOU Different

The standard for health benefit solutions has gone unchanged for years, and has neglected to address the simple fact that different businesses have different needs.

Every business's benefit needs are different – that's why we're different.

HCS takes a personalized approach to optimizing your employer-sponsored benefits. Our benefit professionals deliver financial and underwriting expertise, strategic benefit design, transparent pricing of plan revisions, detailed development of expected claim levels and overall assistance in creating the best plan for your population's health and your business's goals.

Value-Based Payments (VBP)

We believe your members deserve access to quality medical care at fair prices, regardless of where they receive a service. Our VBP program is designed to protect members and employers from exorbitant arbitrary pricing by using Medicare as a benchmark and adding fair provider reimbursement, creating a lower overall payment based on value over price.

Comprehensive health plan administration from HCS includes:

- Account Management

- Pharmacy Benefit Management (PBM)
